July D. Mier | The best thing I got from this course is the sense that I am not alone anymore. I now have a go to place for my parenting issues. Thank you so much Anat ❤️

Audrey Anderson | I have reviewed some of the videos and tried them with my son, and he loves them! I have never seen him so proud of himself!

Abby B. | I believe that your exercises are perfectly composed. I like that you approach the child's development as a whole and that - unlike other websites on similar topics - you give specific, practical tips on supporting the child's development. The format of your video tutorials is very accessible.

Maria Martins | I found some of your video tutorials on YouTube when my son was 5 months old. He was lying on his stomach and was very frustrated because he couldn't move forward. After just a few days of doing your exercises he began to move around his own axis and shortly thereafter began to crawl on his stomach. As for the session with Anat, she was well prepared for it - she knew my son's problems and conditions. Anat gave me very specific advice on how to deal with my son's sleeping problems. She answered all my questions and concerns. Anat had a personal approach - she tried to find out what was causing the sleeping problems specifically in our case and helped me take a new and different approach.
